BLACKTOP

BlackTop is a **permanent**, single component, moisture-cured, **UV stable** coating primarily used for topcoating surfaces previously sealed with RustSeal or any other paint/primer application.

BlackTop is a high performance protective coating **specifically formulated to withstand dulling and fading caused by prolonged sunlight exposure.**

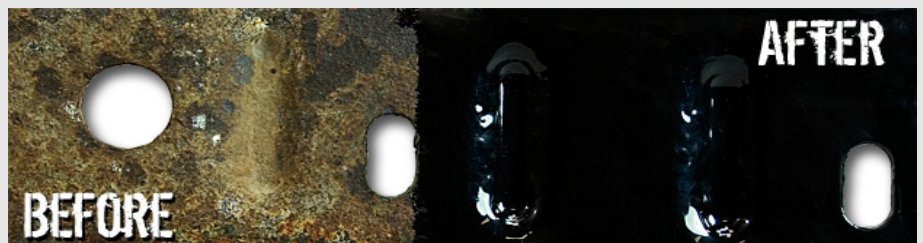

BlackTop may be used alone as a resilient coating but provides the ultimate rust protection when used in combination with RustSeal. For the best stop rust & ultraviolet protection, first apply RustSeal to permanently seal the surface and the topcoat with BlackTop for an **incredibly tough and professional looking finish.**

Like RustSeal, BlackTop dries to a **rock hard yet flexible coating** that can be readily applied to chassis, coil springs and light weight panels. BlackTop also has **high heat resistance** and can be applied to almost all automotive applications except exhaust systems.

APPLICATIONS

- Automotive & Truck Chassis
 - Semi Truck Chassis
 - Farm Equipment
 - Snow Plows
- Engine Compartments
- Suspension Components
 - Floor Pans
 - Trunks
 - Wheels & Rims
- Wrought Iron Railings
 - Fire Escapes
