This terrific all-purpose self-etching primer is ideal for promoting adhesion between multiple surface coatings (including applications of topcoats or primers over cured KBS RustSeal). In addition to priming bare metals such as; steel, brass, aluminum and most hard plastics, Fusion SEP features a high-quality formulation that allows for **maximum adhesion**. Fusion SEP is chromate free, anti-corrosive & infrared compatible.

ADVANTAGES

- Fusion SEP is excellent for priming bare metals such as; **galvanized & zinc coated steel, brass, aluminum, body fillers & most hard plastics.**
- Allows you to topcoat over a smooth, rock hard RustSeal surface that's been in place for months or years. Just lightly sand the surface using 280-320 grit sandpaper before applying a thin covering coat of Fusion SEP. Then topcoat if desired.
- Can be sprayed or brushed on almost any painted surface and is ready for a topcoat in 20-30 minutes.

SURFACES

- Cured Rustseal
- Steel
- Fiberglass
- Aluminum
- Hard Plastics
- Galvanized Steel
- Cured Body Filler
- OEM Enamels
- OEM Lacquers
