XTC is a high temperature/heat resistant coating formulated specifically to protect metal surfaces operating at temperatures from 500°F (260°C) to 1500°F (812°C).

With proper preparation, XTC provides outstanding adhesion, film integrity, weathering, and thermal shock-resistance throughout this entire temperature range, and is **guaranteed not to burn off!**

XTC is ideal for exterior applications because it resists rust when primed with XTC Primer.
